HBS1200-CE • Revolution

Get the right portion of ice every time with the Revolution™ portion system.

- Revolution™ Portion System - For maximum accuracy, this unique ice portioning system counts the number of times the agitator passes the shaver blade. Regardless of the motor load, the correct amount of ice comes out every time! Systems that calculate portions by time or weight may not be delivering consistent drink quality to your customers.
- Double-Wall Hopper - Insulated for quiet operation and to keep ice cold.
- 3-Way Sensor Technology - Jar pad sensor prevents operation when container is not in place; hopper sensor prevents operation when lid is not in place. Drain sensor indicates if water is backed up in the drain. This alerts the operator to check the drain line before a messy water backup.
- Automatic Cycle Buttons - Let operators select serving size and number of servings for precise results.
- Specifications: Standard: Unit comes with base, ice chute, 2 piece hopper with lid, 64 oz. polycarbonate container & leveling feet
- Controls: Touchpad

If you ever wondered why the cocktails served in the most trend setting bars tend to taste so much better, the answer may lie not in the contents of the glass but within the glass itself.
